4800

G-RAIL[®]
ALUMINIUM RAIL

> *by Goelst*

Profile 4800 is suitable for light to medium-heavy curtains and features the optional use of gliders or rollers.

The strength of this profile allows a greater distance between fixing bracket centres.

This is beneficial when using special clips to fix to a suspended ceiling grid where standard width ceiling tiles have to be bridged.

Standard colours: White RAL 9010, natural. Special colours on request.
